## **Clark Construction Achieves Historic Safety Milestone 15 Years With No Lost Time Due to Injury**

Clark Construction Company has achieved yet another safety milestone as the company has now surpassed **15 years with no lost time due to injury**. The landmark accomplishment is another in a series of safety achievements that has led Clark Construction to be widely recognized as national leader in safety among construction industry peers.

“It has been extremely gratifying to see our entire team embrace the importance of safety in the workplace, which is really the reason we have achieved this remarkable milestone,” said Clark Construction CEO Charles Clark. “The type of safety performance we have experienced can only occur if every individual from the home office to every single job site makes safety their highest priority.”

In addition to reaching the 15-year mark without lost time due to injury, Clark expects to surpass four million job hours without lost time during calendar year 2016, which is an unprecedented accomplishment in the commercial construction industry,

Clark management and staff have consciously refused to accept accidents as an unavoidable aspect of construction and set a safety goal for the company of zero hours of lost time due to injuries. The resulting program has earned Clark Construction widespread government and industry recognition for its safety accomplishments, receiving several major awards in recent years, including:

- **Safety Excellence Award** in 2013 from the National Association of General Contractors;
- **CET Platinum Award** from MIOSHA for outstanding accomplishments in safety;
- **CET Gold Award** from MIOSHA for outstanding accomplishments in safety;
- **Safety Excellence Award** from the Michigan Chapter of Associated General Contractors (AGC); and
- **Outstanding Safety Performance Award** from the Accident Fund Insurance Company of America;

Clark Construction was the first Michigan construction company to join Michigan AGC and MIOSHA in a landmark government/industry safety alliance designed to protect the safety and health of Michigan’s construction workers.

*Clark Construction Company was founded in 1946 and is ranked as one of the top 400 CM firms in the nation by Engineering News Record. The firm is headquartered in Lansing, Michigan and maintains a southeast Michigan office in Southfield. Clark Construction has projects in Michigan, Ohio, Kentucky, Virginia, Maryland, Georgia, North Carolina, Kansas and Texas. In addition to a full range of Construction Management services, Clark continues to offer Planning and Pre-Construction Services, Program Management, General Contracting and Design/Build services.*
